Buyers ask ChatGPT, Perplexity and Gemini for a short list. If you're not on it, you're not in the running.

TRY THIS RIGHT NOW

My 60-second AI visibility test.

1 Open ChatGPT, Perplexity or Gemini.

2 Ask what your customer would ask:

> “Who's the best [your service] in [your city]?”

3 See if your name comes up. Then ask about you directly.

POV: you ask ChatGPT about your own business

What do you know about [Your Business]?

I couldn't find much about that business. But here are 3 others you might like:

1. **Your competitor**
2. **The other competitor**
3. **That guy from your old job**

the audacity

How to get on the *short list.*

1 Be crystal clear

Say what you do, who it's for and where. Same words, everywhere.

2 Answer real questions

Put the questions customers actually ask on your site, with straight answers.

3 Get talked about

Reviews, features and directories are where AI learns who's worth naming.
