:Dank Studio

“Why do client briefs always come back half-empty?”

Your clients aren't lazy. Typing is just slow. Meet Sayso.

sayso.dankstudio.net

Swipe

TYPING

Slow. Polished.
Half-finished.

TALKING

Fast. Honest.
Actually finished.

So let them answer out loud.

Talking is roughly 3x faster than typing. Sayso turns any question into one your client can just say.

How it *works.*

1 Send one link

No account for them. No call to schedule.

2 They answer out loud

One question at a time. Voice, text or a link, whatever's easiest.

3 You get the write-up

The recording, a live transcript and a short summary beside it.

:Dank Studio

Real words. Not *AI polish.*

Sayso keeps every answer exactly as it was spoken. No rewriting. So you hear what your client actually thinks, not what a chatbot thought they meant.

Autosaves every 5 seconds

Records offline

Live transcript

Ready-made templates
