:Dank Studio

How a brand's look comes together.

Hint: it starts with words, not logos.

Swipe

01

warm bold playful grounded

Start with keywords.

We pull a handful of words from your questionnaire answers. They steer every visual choice that follows.

02

Pin the feeling.

A rough Pinterest board of images that feel like those words. Not logos to copy, but moods: light, texture, places, objects.

03

Pull the palette.

Colours come straight from the board, then get tested with colour theory, Sanzo Wada's colour dictionary and tools like Coolors.

04

Try it for real.

We drop the palette into real layouts like posts, slides and a homepage, then polish until it feels unmistakably you.

:Dank Studio

Save this for your next rebrand.

Words, pins, palette, polish.

Designers: what's the one tool you'd never build a moodboard *without*?

Tell us in the comments, and follow Dank Studio for more from our process.
